Reg:- Construction of 50 Beds Running Room at the junction of Platform Road and Deviation Road near Bangalore City Station

---

With reference to your letter No D/225/SBC/ dated 3/4th July 1956 on the above subject, I write to state that your Inspector of Works who came to my office on 23rd June 1956 informed me that the Railway had no plans of the boundaries of the land and not that the Corporation had no plans, and said that he could not say as to how far railway land extends He was requested to verify from the Office Records and send plan showing foot-paths, road margins etc , as discussed during our joint inspection The road and footpaths are on Corporation land and not on the railway land as suggested by you

Even the storm water drain which is serving larger area apart from the railway land is Corporation property and it should not be dismantled or as diverted by you

As discussed during our joint inspection, construction of the front half of the building will have to be deferred till the question regarding the land as well as improvement to the road corner are settled The Chief Engineer, Southern Railway, Madras and Regional Engineer, Mysore are also separately addressed in the matter

Letter No.EE-Pr.410/56 dated 15th June 1956 from the Engineer, Corporation of the City of Bangalore, Bangalore to the Executive Engineer, Southern Railways, Bangalore City.

Reg:- Construction of a building at the junction of Platform Road and Deviation Road

Ref - Your letter No D/225/SBC dated 9th June 1956.

With reference to the above, I write to state that though the proposed building is within Railway limits, it being proposed in a corner of Mysore Deviation Road with heavy traffic it will cut off traffic visibility This area was open all these years and the corner of roads had good visibility Whenever any structures are to be put up within the Corporation limits, specially at the junction of roads which cut off the visibility for traffic, it is the concern of the Corporation and the Railways have to consult the Corporation, before taking up any work in such places

Since it is an urgent and serious matter, I request you to kindly arrange to stop the work so that we may have joint inspection with the Commissioner and yourself and settle the matter at spot

A line in reply is requested regarding the date convenient for joint inspection.

cvnl

Letter No. [redacted] 8/4th June 1956 [redacted] the [redacted] Corporation of the City of Bangalore, Bangalore to the [redacted] Engineer, Southern Railways, Bangalore.

It was observed during the inspection that some construction of buildings is going on at the junction of Platform Road and Deviation Road As could be seen from the foundation excavated, the foundations have encroached into the footpaths, buildings to be constructed are likely to obstruct the traffic vision and the storm water drain running near the Vegetable Oil Factory will be affected It is also not known what type of elevation will be given for the building which is situated at the junction of these two roads

As this is a very important road, further action may be stopped until the above facts are given due consideration A detailed plan of the building now proposed for construction may kindly be arranged to be sent up for the approval of the Corporation

PN

Copy of letter No W 435/Y/1 of 12-9-1956 from the CE (I)/LAS to the Commissioner, Corporation of City of Bangalore, Bangalore

Sub Construction of a Running Room at the junction of platform road and deviation road near Bangalore City Railway Station

Ref Your letter No A 4-Pr 271/56-57 dated 10/13-7-56 addressed to the Chief Engineer of this Administration

On a perusal of the papers, it is observed that the Corporation desire that the present construction of the above building should be built in such a manner as not to affect the visibility at the junction roads and that the detailed plan for the building now under construction should have the approval of the Corporation

Under section 7 of the Indian Railways Act and now the Government Buildings Act the construction is exempt from the operations of the Building Provisions of Municipalities or Local Bodies and as such, prior sanction or approval of the plan by the Corporation is not considered necessary The Railway Administration will also be well within their rights to shift the drain pipe, if necessary, according to their convenience

I do not think that widening of the road on a future date by acquisition of Railway land by the Corporation can be a basis for preventing the Railway Administration now from constructing the building which is essential for its administrative working

However, in view of your special request for a joint inspection at higher level to settle the nature of the construction, I agree to the joint inspection being made and a decision reached to the satisfaction of all concerned

The Regional Engineer of this Administration at Mysore is being instructed to contact you for the joint inspection
